Management, 10e (Robbins) Chapter 6 Managers as Decision Makers

1) Problem identification is purely objective.

Answer: FALSE

Diff: 2 Page Ref: 121

Topic: The Decision-Making Process

2) The second step in the decision-making process is identifying a problem.

Answer: FALSE

Diff: 1 Page Ref: 122

Topic: The Decision-Making Process

3) A decision criterion defines what is relevant in a decision.

Answer: TRUE

Diff: 2 Page Ref: 122

Topic: The Decision-Making Process

4) The fourth step of the decision-making process requires the decision maker to list viable alternatives that could resolve the problem.

Answer: TRUE

Diff: 1 Page Ref: 123

Topic: The Decision-Making Process

5) Once the alternatives have been identified, a decision maker must analyze each one.

Answer: TRUE

Diff: 2 Page Ref: 123

Topic: The Decision-Making Process

6) The step in the decision-making process that involves choosing a best alternative is termed *implementation*.

Answer: FALSE

Diff: 2 Page Ref: 123

Topic: The Decision-Making Process

7) Making decisions is with the essence of management.

Answer: TRUE

Diff: 1 Page Ref: 120

Topic: Decision-Making Styles

8) Managerial decision making is assumed to be rational.

Answer: TRUE

Diff: 2 Page Ref: 124

Topic: Decision-Making Styles

9) One assumption of rationality is that we cannot know all of the alternatives.

Answer: FALSE

Diff: 3 Page Ref: 124

10) Managers tend to operate under assumptions of bounded rationality.

Answer: TRUE

Diff: 2 Page Ref: 125

Topic: Decision-Making Styles

11) Studies of the events leading up to the *Challenger* space shuttle disaster point to an escalation of commitment by decision makers.

Answer: TRUE

Diff: 2 Page Ref: 126

Topic: Decision-Making Styles

12) Managers regularly use their intuition in decision making.

Answer: TRUE

Diff: 1 Page Ref: 126

Topic: Decision-Making Styles

13) Rational analysis and intuitive decision making are complementary.

Answer: TRUE

Diff: 2 Page Ref: 126

Topic: Decision-Making Styles

14) Programmed decisions tend to be repetitive and routine.

Answer: TRUE

Diff: 1 Page Ref: 127

Topic: Types of Decisions and Decision-Making Conditions

15) Rules and policies are basically the same.

Answer: FALSE

Diff: 2 Page Ref: 128

Topic: Types of Decisions and Decision-Making Conditions

16) A policy is an explicit statement that tells a manager what he or she ought or ought not to do.

Answer: FALSE

Diff: 2 Page Ref: 128

Topic: Types of Decisions and Decision-Making Conditions

17) The solution to nonprogrammed decision making relies on procedures, rules, and policies.

Answer: FALSE

Diff: 2 Page Ref: 128

Topic: Types of Decisions and Decision-Making Conditions

18) Most managerial decisions in the real world are fully nonprogrammed.

Answer: FALSE

Diff: 1 Page Ref: 128

19) The ideal situation for making decisions is low risk.

Answer: FALSE

Diff: 2 Page Ref: 129

Topic: Types of Decisions and Decision-Making Conditions

20) Risk is the condition in which the decision maker is able to estimate the likelihood of certain outcomes.

Answer: TRUE

Diff: 1 Page Ref: 129

Topic: Types of Decisions and Decision-Making Conditions

21) Risk is a situation in which a decision maker has neither certainty nor reasonable probability estimates.

Answer: FALSE

Diff: 3 Page Ref: 129

Topic: Types of Decisions and Decision-Making Conditions

22) Most managers have characteristics of linear thinking style decision makers.

Answer: FALSE

Diff: 2 Page Ref: 131

Topic: Types of Decisions and Decision-Making Conditions

23) According to the boxed feature, "Managing Workforce Diversity," diverse employees tend to make decisions faster than a homogeneous group of employees.

Answer: FALSE

Diff: 2 Page Ref: 132

Topic: Decision-Making Styles

Skill: AACSB: Multicultural and Diversity

24) The anchoring effect describes when decision makers fixate on initial information as a starting point and then, once set, they fail to adequately adjust for subsequent information.

Answer: TRUE

Diff: 2 Page Ref: 133

Topic: Decision-Making Styles

25) The availability bias describes when decision makers try to create meaning out of random events.

Answer: FALSE

Diff: 2 Page Ref: 134

Topic: Decision-Making Styles

26) The sunk cost error is when decision makers forget that current choices cannot correct the past.

Answer: TRUE

Diff: 2 Page Ref: 134

27) Today's business world revolves around making decisions, usually with complete or adequate information, and under minimal time pressure. Answer: FALSE Diff: 3 Page Ref: 135 Topic: Effective Decision Making in Today's World
28) Managers need to understand cultural differences to make effective decisions in today's fast-moving world. Answer: TRUE Diff: 2 Page Ref: 135 Topic: Effective Decision Making in Today's World Skill: AACSB: Multicultural and Diversity
29) Highly reliable organizations (HROs) are easily tricked by their success. Answer: FALSE Diff: 1 Page Ref: 136 Topic: Effective Decision Making in Today's World
30) Decision making is typically described as, which is a view that is too simplistic. A) deciding what is correct B) putting preferences on paper C) choosing among alternatives D) processing information to completion Answer: C Diff: 2 Page Ref: 121 Topic: The Decision-Making Process
31) A series of eight steps that begins with identifying a problem and concludes with evaluating the decision's effectiveness is the A) decision-making process B) managerial process C) maximin style D) bounded rationality approach Answer: A Diff: 1 Page Ref: 121 Topic: The Decision-Making Process
32) is the existence of a discrepancy between an existing and a desired state of affairs. A) An opportunity B) A solution C) A weakness

Page Ref: 121

D) A problem Answer: D

Diff: 1

- 33) In identifying the problem, a manager _ A) compares the current state of affairs with where they would like to be B) expects problems to be defined by neon lights C) looks for discrepancies that can be postponed D) will not act when there is pressure to make a decision Answer: A Page Ref: 122 Diff: 1 Topic: The Decision-Making Process 34) Which of the following statements is true concerning problem identification? A) Problems are generally obvious. B) A symptom and a problem are basically the same. C) Well-trained managers generally agree on what is considered a problem. D) The problem must be such that it exerts some type of pressure on the manager to act. Answer: D Diff: 2 Page Ref: 122 Topic: The Decision-Making Process 35) What is the second step in the decision-making process? A) identifying decision criteria B) allocating weights to the criteria C) analyzing alternatives D) identifying a problem Answer: A Diff: 2 Page Ref: 122 Topic: The Decision-Making Process 36) To determine the a manager must determine what is relevant or important to resolving the problem. A) geocentric behavior needed B) number of allowable alternatives C) weighting of decision criteria D) decision criteria Answer: D Diff: 2 Page Ref: 122 Topic: The Decision-Making Process 37) What is the third step in the decision-making process? A) allocating weights to the criteria B) analyzing the alternatives C) selecting the best alternative D) implementing the alternative
- Answer: A

Diff: 2 Page Ref: 122

- 38) If all criteria in the decision making are equal, weighting the criteria
- A) improves decision making when large numbers of criteria are involved
- B) is not needed
- C) produces excellent decisions
- D) improves the criteria

Diff: 3 Page Ref: 122

Topic: The Decision-Making Process

- 39) In allocating weights to the decision criteria, which of the following is helpful to remember?
- A) All weights must be the same.
- B) The total of the weights should sum to 1.0.
- C) Every factor criterion considered, regardless of its importance, must receive some weighting.
- D) Assign the most important criterion a score, and then assign weights against that standard.

Answer: D

Diff: 3 Page Ref: 122

Topic: The Decision-Making Process

- 40) What is the step where a decision maker wants to be creative in coming up with possible alternative?
- A) allocating weights to the criteria
- B) analyzing alternatives
- C) developing alternatives
- D) identifying decision criteria

Answer: C

Diff: 1 Page Ref: 123

Topic: The Decision-Making Process

- 41) When analyzing alternatives, what becomes evident?
- A) the strengths and weaknesses of each alternative
- B) the weighting of alternatives
- C) the list of alternatives
- D) the problem

Answer: A

Diff: 1 Page Ref: 123

Topic: The Decision-Making Process

- 42) When developing alternatives in the decision-making process, what must a manager do?
- A) list alternatives
- B) evaluate alternatives
- C) weight alternatives
- D) implement alternatives

Answer: A

Diff: 2 Page Ref: 123

43) Selecting an alternative in the decision-making process is accomplished by A) choosing the alternative with the highest score
B) choosing the one you like best
C) selecting the alternative that has the lowest price
D) selecting the alternative that is the most reliable
Answer: A
Diff: 1 Page Ref: 123
Topic: The Decision-Making Process
Topic. The Beelston Making Process
44) In Step 6 of the decision-making process, each alternative is evaluated by appraising it
against the
A) subjective goals of the decision maker
B) criteria
C) assessed values
D) implementation strategy
Answer: B
Diff: 2 Page Ref: 123
Topic: The Decision-Making Process
45) includes conveying a decision to those affected and getting their commitment to it
45) includes conveying a decision to those affected and getting their commitment to it. A) Selecting an alternative
B) Evaluating the decision effectiveness
C) Implementing the alternatives
D) Analyzing alternatives
Answer: C
Diff: 2 Page Ref: 123
Topic: The Decision-Making Process
Topic. The Decision-Making Process
46) Which of the following is important in effectively implementing the chosen alternative in the
decision-making process?
A) getting upper-management support
B) double-checking your analysis for potential errors
C) allowing those impacted by the outcome to participate in the process
D) ignoring criticism concerning your chosen alternative
Answer: C
Diff: 2 Page Ref: 123-124
Topic: The Decision-Making Process
47) The final step in the decision-making process is to
A) pick the criteria for the next decision
B) reevaluate the weightings of the criteria until they indicate the correct outcome
C) evaluate the outcome of the decision
D) reassign the ratings on the criteria to find different outcomes
Answer: C
Diff: 2 Page Ref: 124
Topic: The Decision-Making Process

- 48) Which of the following is important to remember in evaluating the effectiveness of the decision-making process?
- A) You should ignore criticism concerning the decision-making process.
- B) You may have to start the whole decision process over.
- C) You will have to restart the decision-making process if the decision is less than 50 percent effective.
- D) Ninety percent of problems with decision making occur in the implementation step.

Diff: 3 Page Ref: 124

Topic: The Decision-Making Process

- 49) Managers are assumed to be ______; they make consistent, value-maximizing choices within specified constraints.
- A) rational
- B) leaders
- C) organized
- D) satisficers

Answer: A

Diff: 1 Page Ref: 124

Topic: Decision-Making Styles

- 50) It is assumed that a perfectly rational decision maker _____.
- A) does not follow rational assumptions
- B) does not consider value maximizing as an objective
- C) offers inconsistent decisions
- D) would be objective and logical

Answer: D

Diff: 2 Page Ref: 124

Topic: Decision-Making Styles

- 51) Managers can make rational decisions if _____.
- A) the problem is ambiguous
- B) the goals are unclear
- C) the alternatives are limited
- D) time constraints exist

Answer: C

Diff: 3 Page Ref: 124

Topic: Decision-Making Styles

- 52) Which of the following is not a valid assumption about rationality?
- A) The problem is clear and unambiguous.
- B) A single, well-defined goal is to be achieved.
- C) Preferences are clear.
- D) Preferences are constantly changing.

Answer: D

Diff: 3 Page Ref: 124

53) When managers circumvent the rational decision-making model and find ways to satisfice,
they are following the concept of
A) jurisprudence
B) bounded rationality
C) least-squared exemptions
D) self-motivated decisions
Answer: B
Diff: 2 Page Ref: 125
Topic: Decision-Making Styles
54) Because managers can't possibly analyze all information on all alternatives, managers
, rather than
A) maximize; satisfice
B) maximize; minimize
C) satisfice; minimize
D) satisfice; maximize
Answer: D
Diff: 2 Page Ref: 125
Topic: Decision-Making Styles
Topic. Decision-Making Styles
55) The type of decision making in which the solution is considered "good enough" is known as
A) intuition
B) satisfying
C) maximizing
D) satisficing
Answer: D
Diff: 2 Page Ref: 125
Topic: Decision-Making Styles
Topic. Decision-waking styles
56) When a decision maker chooses an alternative under perfect rationality, she her
decision, whereas under bounded rationality she chooses a decision.
A) minimizes; satisficing
B) satisfices; maximizing
C) maximizes; satisficing
D) maximizes; minimizing
Answer: C
Diff: 3 Page Ref: 125
Topic: Decision-Making Styles
Topic. Decision-waking styles
57) An increased commitment to a previous decision despite evidence that it may have been
wrong is referred to as
A) economies of commitment
B) escalation of commitment
C) dimensional commitment
D) expansion of commitment
Answer: B
Diff: 2 Page Ref: 126
Topic: Decision-Making Styles

58) Intuitive decision making is A) not utilized in organizations
B) a conscious process based on accumulated judgment
C) making decisions based on experience, feelings, and accumulated judgment
D) important in supporting escalation of commitment
Answer: C
Diff: 2 Page Ref: 126
Topic: Decision-Making Styles
59) In studying intuitive decision making, researchers have found that
A) managers do not make decisions based on feelings or emotions
B) managers use data from their subconscious mind to help make their decisions
C) rational thinking always works better than intuitive
D) accumulated experience does not support intuitive decisions
Answer: B
Diff: 2 Page Ref: 126
Topic: Decision-Making Styles
Topic. Decision-Making Styles
60) All of the following are aspects of intuition except
A) experienced-based decisions
B) affect-initiated decisions
C) cognitive-based decisions
D) programmed decisions
Answer: D
Diff: 1 Page Ref: 127 Tonic: Decision Melving Styles
Topic: Decision-Making Styles
61) are straightforward, familiar, and easily defined.
A) Unstructured problems
B) Structured problems
C) Unique problems
D) Nonprogrammed problems
Answer: B
Diff: 2 Page Ref: 127
Topic: Types of Decisions and Decision-Making Conditions
Topic. Types of Decisions and Decision-Waking Conditions
62) Structured problems align well with which type of decision making?
A) programmed
B) satisficing
C) intuition
D) gut feeling
Answer: A
Diff: 2 Page Ref: 127
Topic: Types of Decisions and Decision-Making Conditions
Topic. Types of Decisions and Decision-Making Conditions

65) decision making is relatively simple and tends to rely heavily on previous
solutions.
A) Nonprogrammed
B) Linear
C) Satisficing
D) Programmed
Answer: D
Diff: 2 Page Ref: 127
Topic: Types of Decisions and Decision-Making Conditions
64) A procedure
A) is an explicit statement detailing exactly how to deal with a decision
B) is a series of interrelated sequential steps to respond to a structured problem
C) is a set of guidelines that channel a manager's thinking in dealing with a problem
D) allows a manager to use broad decision-making authority
Answer: B
Diff: 2 Page Ref: 127
Topic: Types of Decisions and Decision-Making Conditions
Topic. Types of Decisions and Decision-Waking Conditions
65) A is an explicit statement that tells a manager what he or she can or cannot do.
A) procedure
B) policy
C) rule
D) solution
Answer: C
Diff: 2 Page Ref: 128
Topic: Types of Decisions and Decision-Making Conditions
Topic: Types of Beelstons and Beelston Hamming Conditions
66) A policy
A) typically contains an ambiguous term
B) is used frequently when a manager faces a structured problem
C) allows little discretion on the part of the manager
D) offers strict rules as to how a problem should be solved
Answer: A
Diff: 2 Page Ref: 128
Topic: Types of Decisions and Decision-Making Conditions
67) What is a difference between a policy and a rule?
A) A policy establishes parameters.
B) A rule establishes parameters.
C) A policy is more explicit.
D) A rule is more ambiguous.
Answer: A
Diff: 2 Page Ref: 128
Topic: Types of Decisions and Decision-Making Conditions

- 73) Lower-level managers typically confront what type of decision making? A) unique B) nonroutine C) programmed D) nonprogrammed Answer: C Diff: 2 Page Ref: 128 Topic: Types of Decisions and Decision-Making Conditions 74) Which of the following is likely to make the most programmed decisions? A) the CEO of PepsiCo B) the vice president of General Motors Cadillac Division C) the head of the Minute Maid Division at Coca-Cola D) the manager of the local McDonald's Answer: D Diff: 1 Page Ref: 128 Topic: Types of Decisions and Decision-Making Conditions 75) ______ is a situation in which a manager can make accurate decisions because the outcome of every alternative is known. A) Certainty B) Risk C) Uncertainty D) Maximax E) Maximin Answer: A Diff: 1 Page Ref: 129 Topic: Types of Decisions and Decision-Making Conditions 76) If an individual knows the price of three similar cars at different dealerships, he or she is operating under what type of decision-making condition? A) risk B) uncertainty C) certainty D) factual Answer: C Diff: 1 Page Ref: 129 Topic: Types of Decisions and Decision-Making Conditions 77) A retail clothing store manager who estimates how much to order for the current spring season based on last spring's outcomes is operating under what kind of decision-making condition? A) seasonal B) risk
- C) uncertainty
- D) certainty

Diff: 3 Page Ref: 129

78) is a situation in which a decision maker has neither certainty nor reasonable probability estimates available. A) Certainty B) Risk C) Uncertainty D) Maximax Answer: C Diff: 1 Page Ref: 130 Topic: Types of Decisions and Decision-Making Conditions
79) Nonprogrammed decisions are typically made under a condition of A) certainty B) low levels of risk C) uncertainty D) reliability Answer: C Diff: 3 Page Ref: 129 Topic: Types of Decisions and Decision-Making Conditions
80) A person at a horse racetrack who bets all of his or her money on the odds-based long shot to "win" (rather than "place" or "show") is making what kind of choice? A) maximax B) maximin C) minimax D) minimin Answer: A Diff: 2 Page Ref: 130 Topic: Types of Decisions and Decision-Making Conditions
81) What best describes the psychological orientation of an individual making a "maximax" choice? A) optimist B) realist C) pessimist D) satisficer Answer: A Diff: 2 Page Ref: 130 Topic: Types of Decisions and Decision-Making Conditions
82) Optimistic managers could be expected to utilize their maximax orientation when they A) maximize the maximum payoff B) maximize the minimum payoff C) minimize the maximum regret D) minimize the minimum regret Answer: A Diff: 1 Page Ref: 130 Topic: Types of Decisions and Decision-Making Conditions

83) What is the psychological orientation of a decision maker who makes a "maximin" choice? A) optimist
B) realist
C) pessimist
D) satisficer
Answer: C
Diff: 2 Page Ref: 130
Topic: Types of Decisions and Decision-Making Conditions
84) Which of the following best describes "maximizing the minimum possible payoff"?
A) maximax
B) maximin
C) minimax
D) minimin
Answer: B
Diff: 2 Page Ref: 130
Topic: Types of Decisions and Decision-Making Conditions
85) A manager who desires to minimize his or her maximim "regret" will opt for a
choice.
A) maximax
B) maximin
C) minimax
D) minimin
Answer: C
Diff: 2 Page Ref: 130 Topic: Types of Decisions and Decision-Making Conditions
Topic. Types of Decisions and Decision-Making Conditions
86) Many managers use or rules of thumb to simplify their decision making.
A) heuristics
B) biases
C) errors
D) habits
Answer: A
Diff: 1 Page Ref: 133
Topic: Decision-Making Styles
87) When decision makers tend to think they know more than they do or hold unrealistically
positive views of themselves and their performance, they are exhibiting
A) self-serving bias
B) the anchoring effect
C) immediate gratification bias
D) overconfidence bias
Answer: D
Diff: 1 Page Ref: 133 Tania: Decision Making Styles
Topic: Decision-Making Styles

88) When decision makers seek out information that reaffirms their past choices and discount information that contradicts past judgments, they are exhibiting ___ A) availability bias B) the anchoring effect C) self-serving bias D) confirmation bias Answer: D Diff: 2 Page Ref: 133 Topic: Decision-Making Styles 89) When decision makers assess the likelihood of an event based on how closely it resembles other events or sets of events, they are using _____. A) availability bias B) framing bias C) selective perception bias D) representation bias Answer: D Diff: 2 Page Ref: 134 Topic: Decision-Making Styles 90) What is the tendency for decision makers to falsely believe that they would have accurately predicted the outcome of an event once that outcome is actually known? A) the hindsight bias B) the sunk costs error C) the randomness bias D) the selective perception bias Answer: A Diff: 2 Page Ref: 134 Topic: Decision-Making Styles 91) To make effective decisions in today's fast-moving world, managers need to _____. A) use the five-stage decision-making process B) know when it is time to call it quits C) ignore cultural differences D) identify their style of decision making Answer: B Diff: 1 Page Ref: 135 Topic: Effective Decision Making in Today's World 92) What is a characteristic that the experts say an effective decision-making process has? A) It is inconsistent. B) It acknowledges only objective thinking. C) It focuses on all factors veven those that do not seem important. D) It requires only as much information and analysis as is necessary. Answer: D Diff: 2 Page Ref: 136 Topic: Effective Decision Making in Today's World

93) What term is used by Navy aviators to describe a gut feeling that something isn't right?
A) leemers
B) the creeps
C) uneasiness
D) regret
Answer: A
Diff: 3 Page Ref: 136
Topic: Effective Decision Making in Today's World
94) Managers of highly reliable organizations (HROs) get the input of and let them
make decisions.
A) CEOs
B) frontline workers
C) customers
D) suppliers
Answer: B
Diff: 1 Page Ref: 136
Topic: Effective Decision Making in Today's World
95) When highly reliable organizations (HROs) face complexity, they
A) try to simplify data
B) aim for deeper understanding of the situation
C) defer to the experts

D) act, then think Answer: B

Diff: 2 Page Ref: 136

Topic: Effective Decision Making in Today's World

Decisions, Decisions (Scenario)

Sondra needed help. Her insurance company's rapid growth was necessitating making some changes, but what changes? Should they add to the existing information system or should they buy a new system? She was given the responsibility of analyzing the company's present information system and deciding what the company should do that would give them plenty of room. She was confused and needed help in making the correct decision.

96) According to the decision-making process, the first step Sondra should take is to _____.

A) analyze alternative solutions

B) identify decision criteria

C) evaluate her decision's effectiveness

D) identify the problem

Answer: D

Diff: 2 Page Ref: 121

- 97) According to the decision-making process, the second step Sondra should take is to
- A) analyze alternative solutions
- B) identify decision criteria
- C) evaluate her decision's effectiveness
- D) allocate weights to the criteria

Diff: 2 Page Ref: 121

Topic: The Decision-Making Process

- 98) Allocating weights to the criteria is the step in the decision-making process that occurs between identifying the decision criteria and ______.
- A) developing the alternatives
- B) selecting alternatives
- C) implementing the alternative
- D) identifying the problem

Answer: A

Diff: 3 Page Ref: 121

Topic: The Decision-Making Process

- 99) When Sondra is conveying her decision to those affected and getting their commitment to it, she is performing which step in the decision-making process?
- A) analyzing alternative solutions
- B) selecting alternatives
- C) implementing the alternative
- D) identifying the problem

Answer: C

Diff: 2 Page Ref: 121

Topic: The Decision-Making Process

100) The very last step Sondra should take, according to the decision-making process, is to

- A) analyze alternative solutions
- B) select alternatives
- C) implement the alternative
- D) evaluate the decision's effectiveness

Answer: D

Diff: 1 Page Ref: 121

The Car (Scenario)

Colleen is a student, and her older brother has loaned her an old car. The car is in need of several repairs before she will feel comfortable driving it.

101) Colleen needs a vehicle, but she has to decide if the vehicle is worth repairing. She is facing
a(n), a discrepancy between an existing and a desired state of affairs.
A) alternative
B) weighted problem set
C) problem
D) certainty avoidance situation
Answer: C
Diff: 2 Page Ref: 121
Topic: The Decision-Making Process
102) In talking with an automotive repair person, Colleen needs to prioritize the repairs. Her first concern is safety of the vehicle. This step in the decision-making process is called A) weighting the decision criteria B) analyzing of alternatives
C) identifying decision criteria
D) selecting an alternative
Answer: C
Diff: 2 Page Ref: 122
Topic: The Decision-Making Process
103) Colleen decides to have all of the problems fixed on the car. She assumes that the repair person has found all the problems and that there will be no problem correcting the imperfections within a specified budget. This is an example of a decision. A) parochial B) irrational C) ethical D) rational Answer: D Diff: 3 Page Ref: 124
Topic: Managers Making Decisions
104) Colleen's brother has a different view of the repairs. He assumes that the repair person is using the best information available, but there may be other unexpected repairs that might surface and that a higher budget might be more reasonable. He is using A) rational decision making B) risk avoidance C) bounded rationality
D) Stage 4 decision making
Answer: C
Diff: 3 Page Ref: 125
Topic: Managers Making Decisions
- opin minimoni minimo positioni

105) Colleen's brother feels the car is worth repairing because he has owned several cars made by the same manufacturer as this car, and he has driven this car for several years. He is using to determine that the car has value despite its need of repair.
A) intuitive decision making
B) selective coordination of thought processes
C) sunk costs
D) return on investment
Answer: A
Diff: 3 Page Ref: 126
Topic: Managers Making Decisions
The First Job (Scenario)
Upon graduation, you search for a job with the university's job placement center. Although you have studied and prepared to work in an advertising agency, the first job that you are offered is a supervisor in a manufacturing company working the afternoon shift from 3:00 P.M. until 11:00 P.M.
 106) If you had made a larger search using the Internet and other employment search processes, you might have been able to find more employment opportunities. This would have been a more decision-making process. A) nonprogrammable B) uncertain
C) risky D) perfectly rational
Answer: D
Diff: 2 Page Ref: 124
Topic: Managers Making Decisions
107) Under bounded rationality, you would be expected to search for a job by A) looking at all the opportunities that can be analyzed in the time available B) looking at all the opportunities available
C) looking "outside the box" in your search
D) analyzing all the opportunities until you find the perfect job
Answer: A
Diff: 3 Page Ref: 125 Tonic: Managers Making Decisions
Topic: Managers Making Decisions
108) If you use a shortened process of searching for a job, it is likely that you rather than maximized in your decision process.
A) minimized
B) rationalized
C) satisficed D) agreed
D) agreed Answer: C
Diff: 3 Page Ref: 125
Topic: Managers Making Decisions

109) During your job search, you depend on	_ decision making by making your decisio
based on accumulated judgment and experience.	
A) experiential	
B) legal	
C) intuitive	
D) formidable	
Answer: C	
Diff: 3 Page Ref: 126	
Topic: Managers Making Decisions	
Is the Picture Clear? (Scenario)	
Sharon was the regional manager of a large cable telev	- · ·
and decisions daily, such as how to price each market,	
should purchase, and how she should handle the increase	asing customer complaints. She needed
some help sorting these issues out.	
110) WI	
110) When a customer calls and requests a refund for a	- -
that such situations are routine and most likely have a	standard response would make the
response a decision.	
A) standard	
B) routine	
C) policy	
D) programmed	
Answer: D	
Diff: 2 Page Ref: 127	
Topic: Types of Decisions and Decision-Making Con	ditions
111) Cometimes Charan follows a	of intermelated accumulated stone for
111) Sometimes Sharon follows a, a series of	of interferated sequential steps for
responding to a structured problem.	
A) rule	
B) policy	
C) procedure	
D) suggestion	
Answer: C	
Diff: 2 Page Ref: 127	
Topic: Types of Decisions and Decision-Making Con	ditions
112) Sometimes Sharon instructs her local managers to	o follow when confronted with
problem situations. These establish parameters for the	
specifically stating what should or should not be done.	
A) rules	
B) procedures	
C) policies	
D) orders	
Answer: C	
$\boldsymbol{\mathcal{C}}$	ditions

113) Unfortunately, Sharon also faces issues containing information that is ambiguous or incomplete, such as what kind of technology to purchase. These are known as problems. A) unstructured B) variable C) random D) hit-and-miss Answer: A Diff: 2 Page Ref: 128 Topic: Types of Decisions and Decision-Making Conditions
Managing Your Career (Scenario)
Michelle has a new job and is learning to perform the tasks assigned to her. Different situations demand different decision-making processes.
114) Michelle finds a situation that instructs her in specific, interrelated, sequential steps to respond to a problem. This is referred to as a A) rule B) policy C) broad guideline D) procedure Answer: D Diff: 2 Page Ref: 127 Topic: Types of Decisions and Decision-Making Conditions
115) Michelle finds a company directive that specifically restricts her from taking certain actions. This is a A) rule B) policy C) broad guideline D) procedure Answer: A Diff: 2 Page Ref: 128 Topic: Types of Decisions and Decision-Making Conditions
116) As she learns the general guidelines of the job, Michelle is given more decision-making authority. The guidelines establish parameters for decision making and are referred as a
A) rule B) policy C) broad guideline D) procedure Answer: B Diff: 2 Page Ref: 129 Topic: Types of Decisions and Decision-Making Conditions

117) Michelle eventually finds a problem that has no cut-and-dry solution. The problem is
unique and will never occur again. This problem is referred to as
A) flexible
B) programmed
C) adaptable
D) nonprogrammed
Answer: D

Decision-Making Conditions (Scenario)
Sandy Jo is the manager for TrucksRUs, a medium-sized hauling service located in the Southeast. She is responsible for scheduling trucks, initiating new routes, and staffing both existing and new routes. She is currently struggling with existing information about the profitability of existing and future truck routes.
118) Sandy Jo can make accurate decisions if she is willing to pay \$5,000 for research about the profitability of various truck routes. If she pays for the research, she believes that she is operating under a condition of
A) certainty D) sight
B) risk
C) uncertainty
D) maximax
Answer: A

Topic: Types of Decisions and Decision-Making Conditions

- 123) In a short essay, list and discuss the eight steps in the decision-making process. Answer:
- a. Step 1: Identifying a problem the decision-making process begins with the existence of a problem or a discrepancy between an existing and a desired state of affairs. However, a discrepancy without pressure to take action becomes a problem that can be postponed.
- b. Step 2: Identify decision criteria once the manager has identified a problem that needs attention, the decision criteria important to resolving the problem must be identified. That is, managers must determine what's relevant in making a decision.
- c. Step 3: Allocating weights to the criteria at this step, the decision maker must weigh the items in order to give them the correct priority in the decision. A simple approach is to give the most important criterion a weight of 10 and then assign weights to the rest against that standard.
- d. Step 4: Developing alternatives \(\text{ the fourth step requires the decision maker to list the viable alternatives that could resolve the problem. No attempt is made in this step to evaluate the alternative, only to list them.
- e. Step 5: Analyzing alternatives \(\) once the alternatives have been identified, the decision maker must critically analyze each one. From this comparison, the strengths and weaknesses of each alternative become evident.
- f. Step 6: Selecting an alternative the sixth step is the important act of choosing the best alternative from among those considered. All the pertinent criteria in the decision have now been determined and weighted, and the alternatives have been identified and analyzed.
- g. Step 7: Implementing the alternative implementation involves conveying the decision to those affected by it and getting their commitment to it. If the people who must carry out a decision participate in the process, they're more likely to enthusiastically support the outcome than if they are just told what to do.
- h. Step 8: Evaluating decision effectiveness \(\perp\) the last step in the decision-making process involves appraising the outcome of the decision to see if the problem has been resolved. Did the alternative chosen and implemented accomplish the desired result? If not, the manager may consider returning to a previous step or may even consider starting the whole decision process over.

Topic: The Decision-Making Process

124) In a short essay, discuss the assumptions of rationality and the validity of those assumptions.

Answer: A decision maker who was perfectly rational would be fully objective and logical. He or she would carefully define a problem and would have a clear and specific goal. Moreover, making decisions using rationality would consistently lead toward selecting the alternative that maximizes the likelihood of achieving that goal. The assumptions of rationality apply to any decision. Rational managerial decision making assumes that decisions are made in the best economic interests of the organization. That is, the decision maker is assumed to be maximizing the organization's interests, not his or her own interests. Managerial decision making can follow rational assumptions if the following conditions are met: the manager is faced with a simple problem in which the goals are clear and the alternatives limited; the time pressures are minimal; the cost of seeking out and evaluating alternatives is low; the organizational culture supports innovation and risk taking; and outcomes are relatively concrete and measurable. However, most decisions that managers face in the real world don't meet all of those tests.

Topic: Managers Making Decisions

125) In a short essay, discuss bounded rationality and satisficing.

Answer: Despite the limits to perfect rationality, managers are expected to follow a rational process when making decisions. However, certain aspects of the decision-making process are not realistic as managers make decisions. Instead, managers tend to operate under assumptions of bounded rationality; that is, they behave rationally within the parameters of a simplified decision-making process that is limited by an individual's ability to process information. Managers satisfice, rather than maximize, because they can't possibly analyze all the information on all of the alternatives. That is, they accept solutions that are "good enough." They are being rational within the limits of their information-processing ability.

Topic: Managers Making Decisions

126) In a short essay, discuss the difference between structured and unstructured problems. Include specific examples of each type of problem to support your answer. Next, discuss the type of decisions that would be used to address each of these problems.

Answer: a. Structured problems the goal of the decision maker is clear, the problem is familiar, and information about the problem is easily defined and complete. Examples of these types of problems might include a customer wanting to return a purchase to a retail store, a supplier being late with an important delivery, a news team responding to an unexpected and fast-breaking event, or a college's handling of a student wanting to drop a class. Such situations are called structured problems because they are straightforward, familiar, and easily defined problems. In handling these problem situations, the manager uses a programmed decision. Decisions are programmed to the extent that they are repetitive and routine and to the extent that a definite approach has been worked out for handling them. Since the problem is well structured, the manager doesn't have to go to the trouble and expense of going through an involved decision progress. Programmed decision making is relatively simple and tends to rely heavily on previous solutions.

b. Unstructured problems these problems are new or unusual, and information for them is ambiguous or incomplete. For example, the selection of an architect to design a new corporate manufacturing facility in Bangkok is an example of an unstructured problem. When problems are unstructured, managers must rely on nonprogrammed decision making in order to develop unique solutions. Nonprogrammed decisions are unique and nonrecurring. When a manager confronts an unstructured problem or one that is unique, there is no cut-and-dry solution. It requires a custom-made response through nonprogrammed decision making.

Diff: 3 Page Ref: 127

- 127) In a short essay, discuss the differences among a procedure, a rule, and a policy. Include specific examples of each to support your answer.
- Answer: a. A procedure is a series of interrelated sequential steps that a manager can use for responding to a structured problem. The only real difficulty is in identifying the problem. Once the problem is clear, so is the procedure. For instance, a purchasing manager receives a request from the sales department for 15 PalmPilots for use by the company's customer service representatives. The purchasing manager knows that there is a definite procedure for handling this decision. The decision-making process in this case is merely executing a simple series of sequential steps.
- b. A rule is an explicit statement that tells a manager what he or she can or cannot do. Managers frequently use rules when they confront a structured problem because they are simple to follow and ensure consistency. For example, rules about lateness and absenteeism permit supervisors to make disciplinary decisions rapidly and with a relatively high degree of fairness.
- c. A policy provides guidelines to channel a manager's thinking in a specific direction. In contrast to a rule, a policy establishes parameters for the decision maker rather than specifically stating what should or should not be done. Policies typically contain an ambiguous term that leaves interpretation up to the decision maker. For instance, each of the following is a policy statement: "The customer always comes first and should always be satisfied," "We promote from within, whenever possible," and "Employee wages shall be competitive within community standards."

Diff: 2 Page Ref: 128

- 128) In a short essay, discuss six of the twelve common decision errors and biases that managers make.
- Answer: a. When decision makers tend to think they know more than they do or hold unrealistically positive views of themselves and their performance, they're exhibiting the *overconfidence bias*.
- b. The *immediate gratification bias* describes decision makers who tend to want immediate rewards and to avoid immediate costs. For these individuals, decision choices that provide quick payoffs are more appealing than those in the future.
- c. The *anchoring effect* describes when decision makers fixate on initial information as a starting point and then, once set, fail to adequately adjust for subsequent information. First impressions, ideas, prices, and estimates carry unwarranted weight relative to information received later.
- d. When decision makers selectively organize and interpret events based on their biased perceptions, they're using the *selective perception bias*. This influences the information they pay attention to, the problems they identify, and the alternatives they develop.
- e. Decision makers who seek out information that reaffirms their past choices and discount information that contradicts past judgments exhibit the *confirmation bias*. These people tend to accept at face value information that confirms their preconceived views and are critical and skeptical of information that challenges these views.
- f. The *framing bias* is when decision makers select and highlight certain aspects of a situation while excluding others. By drawing attention to specific aspects of a situation and highlighting them, while at the same time downplaying or omitting other aspects, they distort what they see and create incorrect reference points.
- g. The *availability bias* is when decisions makers tend to remember events that are the most recent and vivid in their memory. The result is that it distorts their ability to recall events in an objective manner and results in distorted judgments and probability estimates.
- h. When decision makers assess the likelihood of an event based on how closely it resembles other events or sets of events, that's the *representation bias*. Managers exhibiting this bias draw analogies and see identical situations where they don't exist.
- i. The *randomness bias* describes when decision makers try to create meaning out of random events. They do this because most decision makers have difficulty dealing with chance even though random events happen to everyone and there's nothing that can be done to predict them.
- j. The *sunk costs error* is when decision makers forget that current choices can't correct the past. They incorrectly fixate on past expenditures of time, money, or effort in assessing choices rather than on future consequences. Instead of ignoring sunk costs, they can't forget them.
- k. Decision makers who are quick to take credit for their successes and to blame failure on outside factors are exhibiting the *self-serving bias*.
- l. Finally, the *hindsight bias* is the tendency for decision makers to falsely believe that they would have accurately predicted the outcome of an event once that outcome is actually known.

129) In a short essay, identify and discuss the five habits shared by highly reliable organizations (HROs).

Answer: Karl Weick, an organizational psychologist identifies five shared habits of highly reliable organizations. First, they are not tricked by their success. HROs are preoccupied with their failures. They are alert to the smallest deviations and react early and quickly to anything that does not fit with their expectations. Another characteristic of HROs is that they defer to the experts on the front line. Frontline workers those who interact day in and day out with customers, products, suppliers, an so forth have firsthand knowledge of what can and cannot be done, what will and will not work. Get their input. Let them make decisions. Next, HROs let unexpected circumstances provide the solution. The fourth habit of HROs is that they embrace complexity. Because business is complex, these organizations aim for deeper understanding of the situation. They ask "why" and keep asking why as they probe more deeply into the causes of the problem and possible solutions. Finally, HROs anticipate, but alto anticipate their limits. These organizations do try to anticipate as much as possible, but they recognize that they can't anticipate everything. As Weick says, they don't "think, then act." They think by acting. By actually doing things, you'll find out what works and what doesn't.
